No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1987 articles are as shown on the article title pages: if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 43

NUMBER 1, JUNE 1987

S. S. CHAUHAN, V. K. CHAUDHARY, SATYA NARAYAN, AND U. K. MISRA. Cytotoxicity of Inhaled Coal Fly Ash in Rats 1

J. K. KONDAL, P. K. SAXENA, AND G. L. SONI. Effect of a Vegetable Oil Factory Effluent on *in Vitro* Lipid and Protein Synthesis by the Liver of the Freshwater Teleost *Heteropneustes fossilis* (Bloch) 13

NEVENKA GRUDEN. Cadmium–Manganese Interaction in the Rat's Duodenum 19

SANJAY GUPTA, SHRI DHAR PANDEY, VIRENDRA MISRA, AND P. N. VISWANATHAN. Alkaline Phosphatase as a Model for Studying Metal–Protein Interactions in Pulmonary Toxicity 24

M. J. KIEFER, R. M. BUCHAN, T. J. KEEFE, AND K. D. BLEHM. A Predictive Model for Determining Asbestos Concentrations for Fibers Less than Five Micrometers in Length. 31

K. R. UNNIKUMAR AND P. P. SOOD. Methylmercury Chloride-Induced and Antagonist-Reverted Succinic Dehydrogenase Changes in the Brain and Trigeminal Ganglia of the Rat 39

RAJ K. UPRETI AND RAVI SHANKER. 2,5-Hexanedione-Induced Immunomodulatory Effect in Mice 48

J. E. M. THYGESEN, B. BACH, L. MØLHAVE, O. F. PEDERSEN, J. U. PRAUSE, AND P. SKOV. Tear Fluid Electrolytes and Albumin in Persons under Environmental Stress 60

JUNKO MATSUBARA, YUHKI TAJIMA, AND MIKA KARASAWA. Promotion of Radioresistance by Metallothionein Induction prior to Irradiation 66

C. LAFUMA, A. HARF, F. LANGE, L. BOZZI, J. L. PONCY, AND J. BIGNON. Effect of Low-Level NO_2 Chronic Exposure on Elastase-Induced Emphysema 75

RICK K. YIP AND DANNY A. RILEY. Effects of Methylmercury on the Motor and Sensory Innervation of the Rat Extensor Digitorum Longus Muscle 85

M. F. O'SULLIVAN, C. J. CORN, AND R. F. DODSON. Comparative Efficiency of Nuclepore Filters of Various Pore Sizes as Used in Digestion Studies of Tissue 97

JACOB GARTY. Metal Amounts in the Lichen *Ramalina Duriaei* (De Not.) Bagl. Transplanted at Biomonitoring Sites around a New Coal-Fired Power Station after 1 Year of Operation 104

M. Batiste-Alentorn, N. Xamena, A. Velázquez, A. Creus, and R. Marcos. Studies on the Toxicity of Cypermethrin and Fenvalerate in Different Strains of *Drosophila melanogaster* Meig. (Insecta, Diptera) 117

Jerome B. Westin, Marcel J.-J. Castegnaro, and Marlin D. Friesen. *N*-Nitrosamines and Nitrosatable Amines, Potential Precursors of *N*-Nitramines, in Children's Pacifiers and Baby-Bottle Nipples 126

B. K. Behera and Shabbir A. Sayeed. Effect of Sugar Mill Effluent on Oxygen Uptake and Carbon Dioxide Output of Rice (*Oryza sativa* L.c.v. Mushoori) Seedlings 135

Ronald J. Palmer, John L. Butenhoff, and Jeffrey B. Stevens. Cytotoxicity of the Rare Earth Metals Cerium, Lanthanum, and Neodymium *in Vitro:* Comparisons with Cadmium in a Pulmonary Macrophage Primary Culture System 142

John R. Lymangrover, Emmanuel Keku, S. T. Hsieh, William P. Dunlap, and Y. Jo Seto. Direct Power-Frequency Electric Field Effects on Mammalian Endocrine Tissue 157

M. A. Medinsky, J. M. Benson, and C. H. Hobbs. Lung Clearance and Disposition of ^{63}Ni in F344/N Rats after Intratracheal Instillation of Nickel Sulfate Solutions 168

Lars Berghem, Mona Hansson, Margot Lundborg, and Per Camner. Fibronectin Concentrations in Lung Lavage Fluid after Inhalation Exposure to Low Levels of Metals 179

Hidekazu Fujimaki, Fujio Shiraishi, Tetsuo Ashikawa, and Masataka Murakami. Changes in Delayed Hypersensitivity Reaction in Mice Exposed to O_3 186

Cham E. Dallas, David N. Mellard, Jeffrey C. Theiss, A. Ray Pentecost, and Edward J. Fairchild II. Distribution of DNA and RNA Content in the Bone Marrow and Alveolar Macrophages of Rats after Subchronic Inhalation of Formaldehyde 191

David J. Thomas, Henry L. Fisher, Martha R. Sumler, Paul Mushak, and Larry L. Hall. Sexual Differences in the Excretion of Organic and Inorganic Mercury by Methyl Mercury-Treated Rats . . 203

Richard G. Barbers and John Oishi. Effects of *in Vitro* Asbestos Exposure on Natural Killer and Antibody-Dependent Cellular Cytotoxicity 217

Anne Johansson, Bengt Robertson, and Per Camner. Nodular Accumulation of Type II Cells and Inflammatory Lesions Caused by Inhalation of Low Cobalt Concentrations 227

C. van Netten, R. L. Brubaker, C. J. G. Mackenzie, and W. J. Godolphin. Blood Lead and Carboxyhemoglobin Levels in Chainsaw Operators 244

Henry A. Feldman, Joseph D. Brain, and Margaret L. Harbison. Adjusting for Confounded Variables: Pulmonary Function and Smoking in a Special Population 251

Mairam Gulumian and Terence Arthur Kilroe-Smith. Crocidolite-Induced Lipid Peroxidation in Rat Lung Microsomes. I. Role of Different Ions 267

Review

Yahya M. Nor. Ecotoxicity of Copper to Aquatic Biota: A Review 274

Announcement 283

Number 2, August 1987

Human Studies

M. Shariatpanahi and A. C. Anderson. Bacterial Survey of Well Water—Tehran, Iran 285

Lance A. Wallace, Edo D. Pellizzari, Tyler D. Hartwell, Charles Sparacino, Roy Whitmore, Linda Sheldon, Harvey Zelon, and Rebecca Perritt. The TEAM Study: Personal Exposures to Toxic Substances in Air, Drinking Water, and Breath of 400 Residents of New Jersey, North Carolina, and North Dakota 290

Pekka Nuorteva, Timo Assmuth, Tari Haahtela, Jarmo Ahti, Elina Kurvonen, Tiina Nieminen, Timo Saarainen, Kaarina Seppälä, Pentti Veide, and Sirpa Viholainen. The Prevalence of Asthma among Inhabitants in the Vicinity of a Polyurethane Factory in Finland 308

David V. Bates and Ronnie Sizto. Air Pollution and Hospital Admissions in Southern Ontario: The Acid Summer Haze Effect 317

Michael D. Lebowitz, Lynne Collins, and Catharine J. Holberg. Time Series Analyses of Respiratory Responses to Indoor and Outdoor Environmental Phenomena 332

Animal Studies

Ashok K. Singh and Lester R. Drewes. Neurotoxic Effects of Low-Level Chronic Acephate Exposure in Rats 342

Xu Ying-han, Zhang Suo-jiang, Wu Cho-quin, Zhou Jian, Chang Hong-fu, and Yu Sheng-qiang. The Pathogenicity of Dust from a Fluorite Mine 350

FENG JINGYIE AND LIN BAOYENG. Cytogenetic Effects of an Agricultural Antibiotic, Captan, on Mouse Bone Marrow and Testicular Cells 359

PETER S. LEE, ROBERT A. GORSKI, WILLIAM E. HERING, AND TAI L. CHAN. Lung Clearance of Inhaled Particles after Exposure to Carbon Black Generated from a Resuspension System 364

D. E. BICE, F. F. HAHN, J. BENSON, R. L. CARPENTER, AND C. H. HOBBS. Comparative Lung Immunotoxicity of Inhaled Quartz and Coal Combustion Fly Ash 374

CHAU-FONG CHEN AND HWAI-SZE FANG. The Renal Functions following a Severe Hypoxia in Conscious Rats 390

NICHOLAS HAHON AND JAMES A. BOOTH. Silicate Minerals and the Interferon System 395

IN VITRO STUDIES

JAN MEADOWS AND ROBERT C. SMITH. Uric Acid Protects Erythrocytes from Ozone-Induced Changes 410

LAJOS TRÉZL, KWANG SOOK PARK, SANGDUK KIM, AND WOON KI PAIK. Studies on *in Vitro* S-Methylation of Naturally Occurring Thiol Compounds with *N*-Methyl-*N*-Nitrosourea and Methyl Methanesulfonate 417

MINERALOGICAL STUDIES

A. G. WYLIE, R. L. VIRTA, AND J. M. SEGRETI. Characterization of Mineral Population by Index Particle: Implication for the Stanton Hypothesis 427

BOOK REVIEWS

ARTHUR L. FRANK. *The Hawk's Nest Incident: America's Worst Industrial Disaster*. By Martin Cherniack 440

JOSÉ A. VALCIUKAS. *Principles and Methods for the Assessment of Neurotoxicity Associated with Exposure to Chemicals*. IPCS International Programme on Chemical Safety. 441

IN MEMORIAM

MYRON A. MEHLMAN. Jerry F. Stara 444

ANNOUNCEMENT 446

AUTHOR INDEX FOR VOLUME 43 447

The Subject Index for Volume 43 will appear in the December 1987 issue as part of a cumulative index for the year 1987.

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines concerned with man–environment relationships: it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. The text of the manuscript should not exceed 10 double-spaced pages (excluding title page, abstract, and references).

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages. The abstract should not exceed 200 words. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts*. If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-Rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance (with Arabic numerals); type each table double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.). Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Wong, M. H., and Lau, W. M. (1985). Root growth of *Cynodon dactylon* and *Eleusine indica* collected from motorways at different concentrations of lead. *Environ. Res.* **36,** 257–267.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observations" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, NY 10029. Correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Subscription Department, 1 East First Street, Duluth, MN 55802. Correspondence concerning manuscripts in production and proofs should be addressed to Academic Press, Inc., Journal Production Department, 1250 Sixth Avenue, San Diego, CA 92101.
